Expert Lecture Series – IITM 2017

Report on Dividend Decisions

Date: 16th March 2017

Organized for: MBA students

Resource Person: Prof. Madhu Vij, Associate Professor, Faculty of Management Studies, University of Delhi

Venue: Room No. 103, IITM

Name of Coordinating Person: Ms. Nidhi Ahuja

A guest lecture was held at IITM, on the topic “**Dividend Decisions**“. The **Dividend Decision** is one of the crucial decisions made by the finance manager relating to the payouts to the shareholders. Professor explained the optimal dividend decisions and its policies.

Afterwards, professor discussed about the various factors affecting dividend policy. Also, the theories of dividends were discussed which are of two types: relevance theories and non relevance theories. Under the irrelevance theories, Walter's model, Gordon's model and Modigliani and miller hypothesis were discussed. The various forms of dividends are cash dividend, stock dividend and stock split

A better understanding and framework was provided to students with the help of real life examples. Students participated with full enthusiasm and it was indeed an informative, interactive and learning session.
